

# KIDS' zone

## Make your own bird feeder

### What you'll need:

Toilet roll

Two long sticks

Some lard or suet  
(or vegetable suet)

Birdseed, spread out  
on a plate or tray

A piece of string

### Instructions:

1. Make four holes in one end of your cardboard tube, large enough for your sticks. Make sure the holes opposite each other line up so you can thread your sticks through
2. Make two small holes opposite each other in the other end of your tube
3. Spread lard or suet (or veggie alternative) over your roll
4. Roll the tube in bird seed so that the seed sticks to the lard
5. Carefully thread the sticks through to make a cross shape
6. Thread a piece of string through the two top holes
7. Hang your feeder outside!
